

AISIN Grease NLGI 2 & 3

GENERAL PURPOSE GREASE

DESCRIPTION

Smooth, buttery texture, reddish brown & black, translucent, general purpose automotive and industrial grease with adhesive properties manufactured from lithium soap and containing an oxidation inhibitor.

TYPICAL APPLICATIONS

- Most automotive grease applications including wheel bearings, ball joints, universal joints and linkages.
- Industrial ball and roller bearing, plain bearing, middle bearing.
- General industrial applications where EP characteristics are not needed.

PERFORMANCE STANDARDS

- NLGI 2 and NLGI 3

CUSTOMER BENEFITS

- Protects bearings from damage under light-load or shock-load conditions.
- Lubricates effectively in wet conditions due to its resistance to water washout.
- Provides long service life through high oxidation stability.
- Resists leakage from bearing through good mechanical stability.
- Does not run down and gives continuous lubrication through excellent tackiness.

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected.
