

Tech Note AG4

310mm Twin Plate Upgrade

Ref: TNAG4

Issue Date: April 2017

Issue Number: 1

If the vehicle is fitted with a 280mm clutch, a 310mm clutch can be fitted instead. When fitting the 310mm clutch the flywheel must be machined by accurate turning on a lathe to ensure the flywheel balance is not affected.

Please be aware that the vehicle may have had an increased size clutch fitted previously and may not require any modifications.
