

Clutch Kits For Modified Vehicles

Ref: TNT

Issue date: 14 Dec 2004

Issue number: 2

It is the responsibility of the installer to specify the correct engine horsepower and re-powered engine modifications when ordering a replacement clutch for a modified vehicle.

Failure to do so can result in premature clutch wear and/or clutch failure, voiding any warranty coverage.

If in doubt please check with your Exedy clutch distributor.

NOTE

Clutch components such as covers and plates may appear to be visually identical but their torque and horsepower ratings could be completely different, rendering these components unsuitable as replacements.
