

Ford Everest UA

2.0ltr/3.2ltr, Engine YNWS/P5AT, Diesel 143/157KW

We are pleased to announce the addition of the Coolmaster Off Road Transmission Cooler Kit to suit Ford Everest into the EXEDY range. Whether your customer is towing a boat, carrying a heavy load or just in heavy traffic, the cooler transmission kit will help to protect the transmission from overheating and premature failure.

CKT-Everest

One of the most common calls we field day-to-day relate to transmission external oil coolers. Today's multi speed transmissions have to contend with ever-increasing operating temperatures due to increased vehicle loads and towing capacities, coupled with inadequacies of OEM in-built cooling systems. The resulting excess temperature is a common cause of premature transmission failure.
