

## Volkswagen Amarok 2H

2.0ltr/3.0ltr, Engine CSHA/CNEA/DDXC/DDXE, Diesel 132/165/190KW

We are pleased to announce the addition of the Coolmaster Off Road Transmission Cooler Kit to suit Volkswagen Amarok into the EXEDY range. Whether your customer is towing a boat, carrying a heavy load or just in heavy traffic, the cooler transmission kit will help to protect the transmission from overheating and premature failure.

### CKT-Amarok

One of the most common calls we field day-to-day relate to transmission external oil coolers. Today's multi speed transmissions have to contend with ever-increasing operating temperatures due to increased vehicle loads and towing capacities, coupled with inadequacies of OEM in-built cooling systems. The resulting excess temperature is a common cause of premature transmission failure.
